(57) **ABSTRACT**

A case (100) for an electrical device includes: (a) a first portion (110) with a bottom surface (111); (b) a second portion (121) adjacent to the first portion; (c) a third portion (122) adjacent to the second portion; (d) a fourth portion (123) adjacent to the third portion; and (e) a fifth portion (132) with an interior surface (235) and adjacent to the fourth portion. In this embodiment, at least one of the first portion or the third portion is configured to be removably coupled to the electrical device. Additionally, when the case placed in an open configuration, the first portion is capable of being located over the fifth portion with the bottom surface of the first portion adjacent to the interior surface of the fifth portion.
